

Press release

Top research leaders selected by the European Research Council in its second competition for "Advanced Grants".

14 January 2010

In its second competition for established top researchers ("Advanced Grants"), the European Research Council (ERC) has selected 236 research leaders to perform their pioneering research throughout Europe. Under the EU's 7th Research Framework Programme, the ERC supports projects aiming at making important discoveries in any domain, from economics to nanotechnology, from psychology to climate change. Each of the "Advanced Grants" amounts to up to €3.5 million and the estimated total call budget is €515 million.

ERC President Prof. Fotis Kafatos said: *" The ERC Scientific Council and I are very pleased with the result, and with the quality of the proposals and of the peer review. With the successful conclusion of this fourth ERC call - which is the second Advanced Grant competition - the ERC is now well established as a European funding organisation supporting excellent, bottom-up frontier research. Our working methods are refined and improved based on past experience, and the ERC has already enabled many hundreds of first class researchers to pursue their ground-breaking and creative ideas in Europe."*

The successful researchers are of 26 nationalities and will be working in universities or other research institutions in 18 different countries. Four researchers currently based outside Europe are moving to an EU member state or associated country to take up their ERC grant.

The average age of these research leaders is 53 years. Around 15% are women, which is a slight increase from the last call (12%). The number of women applicants, on the other hand, was 14% in this call.

The distribution of proposals per domain is the following: 44% in Physical Sciences and Engineering, 38% in Life Sciences and 18% in Social Sciences and Humanities.

"The investment and trust in top talent is pivotal for Europe's research base, in time of economic downturn more than ever, as it will have a positive impact on the economy, but also on Europe as a whole." Prof. Kafatos added.

Lists of selected researchers

In the below lists, the proposals selected for funding are shown (236). Some additional funds are expected to be confirmed shortly and will enable the ERC to support a few more projects, which are presently on a reserve list. The lists will subsequently be updated. Proposals placed on the reserve lists will only be published once their actual funding has been confirmed.

Note to the editors

The European Research Council (ERC) is in charge of the newest, pioneering component of the EU's Seventh Research Framework Programme (the "Ideas" specific programme) and has a total budget of € 7.5 billion (2007-2013). Set up in 2007, the ERC aims to stimulate scientific excellence in Europe by supporting and encouraging the best creative scientists, scholars and engineers of any nationality in any field of research, to work in European host institutions.

The ERC is chaired by Prof. Fotis Kafatos and its Secretary General is Prof. Andreu Mas-Colell.

ERC Advanced Grant in brief

- Supports the very best established research leaders in Europe.
- Funds pioneering frontier research in any field. Interdisciplinarity is encouraged.
- Funding: up to € 3.5 million per grant for up to 5 years.
- Calls for proposals: published annually in Autumn with deadlines in Spring.

ERC also supports early-career top researchers (2 to 10 years after their PhD). The calls for proposals for "Starting Grants" are generally published in Summer with deadlines in Autumn.
